The Winners Experiment
Lucky Numbers Project

The world-exclusive information in front of you here is the result of many months of research and analysis. It is being released now to you as a registered member of the Winners Experiment *Lucky Numbers* Project. We are all now setting off on an exciting journey to search for proof of the existence of *Lucky Numbers*.
If we are successful, *we* will get the evidence to prove our theory, and *you* could get a very welcome cash boost. So let's make a start right now…

(To keep a copy of the Winners Experiment User Manual, "Right Click" and "Save as...")

How to use your Winners Experiment *Lucky Numbers* to make Football Pools entries

If you have never played Football Pools before, you can get full details on the official Football Pools website

On the Pools website, click on "Classic Pools"

and look for the "How to Play" button

(To access the links contained in this document, you will need to be connected to the Internet.)

The idea behind the Winners Experiment project is that you will link up your own name and birth date personal *Lucky Numbers* with the unique *Lucky Numbers* revealed in the names of football teams. Where you find a direct and exact corresponding of numbers, those are the match selections you will make for your pools entry. (There is also an alternative way of making football pools entries, using the Winners Experiment team name lucky numbers alone, and that will be explained a little later.)

Using the *full* Winners Research method, you will be guided to your selections automatically by your own personal *Lucky Numbers*, so you will be making pools entries that are *specific* and *positive* for you alone. No guesswork; no picking with a pin; these football pools choices will be revealed to you exclusively because of your own personal name and birth date *Lucky Numbers*.

First, make sure you have a secure record of your FOUR Winners Experiment personal *Lucky Numbers* which have been calculated for you. Write them down and keep them somewhere safe. You will have numbers under four categories; Name, Birth Date, Destiny and Personality. Sometimes, due to special individual circumstances, you may find certain numbers are repeated in different categories. This can be considered to be increasing their power.

The traditional British Football Pools are played every week from August to May.
So next you need to have the current 49-match football pools list, or *Pools Coupon*.
The current coupon is always available on the Football Pools website.

Click here to see this week's pools coupon.

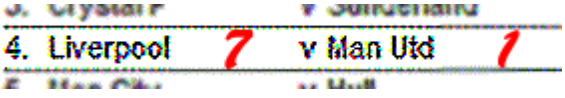
You'll be making your actual pools entries online, easily and quickly, on the Football Pools website. But first you need to pick out your Winners Experiment match selections based on your own personal *Lucky Numbers*. For this, it's useful to print a copy of the current pools coupon. Here's how:

1: On the Football Pools website, go onto "Classic Pools" and click the
Full view
button on the coupon you want to play.

2: Click the right button of your mouse and select "Print". You can now print your copy of the coupon match list.

Now go through your printed pools coupon list, match by match, and alongside each team name, write down the *Lucky Number* for that team, as revealed in the Winners Experiment Football Team Name *Lucky Numbers* List. This list is included at the end of this document.
(You'll probably want to print the Team Name Lucky Numbers List and keep it handy.)

For example, as you go through the football pools coupon, with a match such as Liverpool v Man Utd, you would write 7 against Liverpool and 1 against Man Utd.
See the ilustration below below.



Have a look at the Team Name *Lucky Numbers* List and look for Liverpool and Man Utd. See the numbers revealed in the list against their names and this will become clear.

When you have written a *Lucky Number* alongside each team name in the whole 49-match list for the current pools coupon, you are ready to let your Winners Experiment personal *Lucky Numbers* automatically find that week's pools selections for you. With your Winners Experiment FOUR personal *Lucky Numbers* in front of you, go through the pools coupon match list (the one you have just written the numbers on) and highlight all the matches where *both* teams have *Lucky Numbers* that are the same as yours.

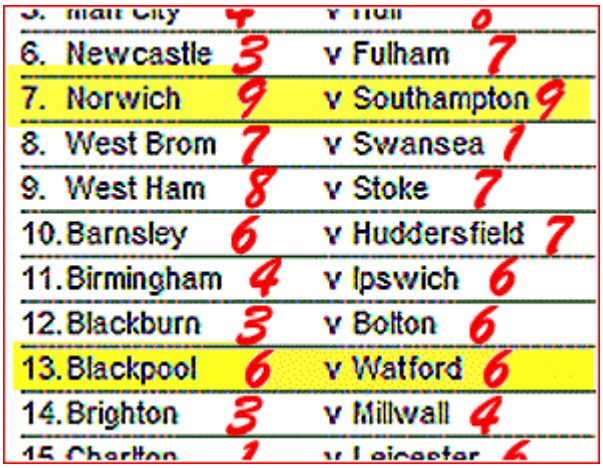
For example, if your Winners Experiment personal *Lucky Numbers* were 3, 6, 7 and 9, you would look for matches on the coupon where BOTH teams have team name *Lucky Numbers* that are 3 or 6 or 7 or 9. This means you would make selections like the examples shown below *highlighted in yellow.*
(All the highlighted matches have been selected because BOTH team names have *Lucky Numbers* that are the same as the example personal *Lucky Numbers* – 3, 6, 7 or 9)

4.	Liverpool 7	v Man Utd 1	
5.	Man City 4	v Hull 8	
6.	Newcastle 3	v Fulham 7	
7.	Norwich 9	v Southampton 9	
8.	West Brom 7	v Swansea 1	
9.	West Ham 8	v Stoke 7	
10.	Barnsley 6	v Huddersfield 7	
11.	Birmingham 4	v Ipswich 6	
12.	Blackburn 3	v Bolton 6	
13.	Blackpool 6	v Watford 6	
14.	Brighton 3	v Millwall 4	
15.	Charlton 1	v Leicester 6	
16.	Derby 9	v Burnley 7	
17.	Doncaster 9	v Bournemouth 8	
18.	Leeds 9	v QPR 7	
19.	Middlesboro 8	v Sheff Wed 4	

Depending on which pools entry you want to play, you will need 10, 11 or 12 selections to make your entry. Usually you should find that you will be able to highlight enough matches, where *both* teams have *Lucky Numbers* that are the same as your own personal *Lucky Numbers*, to give you a complete pools entry of 10, 11 or 12. If one week you should need an extra match or two to make up your required number of selections, simply pick any match where *either one* of the team *Lucky Numbers* corresponds to one of your own personal *Lucky Numbers*. We recommend using your *name* personal number in this case, since that most closely represents your true self. In the same way, if you find you have too many highlighted selections for your chosen pools entry and you need to delete one, leave out a match that does NOT include your *name* personal number.

Alternative method of Winners Research Pools Selections

For a more direct way of using the Winners Research prediction information, use this quick and simple method. This involves looking at each match on the current pools coupon, and checking the team name *Lucky Numbers* as revealed in the Team Names *Lucky Numbers* List. Where both teams have the same *Lucky Number*, that match should be one of your draw selections. In the example coupon below, Norwich v Southampton would be predicted as a draw (both team name *Lucky Numbers* are 9) and Blackpool v Watford would also be predicted as a draw (both 6). Check through the whole coupon to find all the matches where the team name *Lucky Numbers* are the same, then you make your entry.



6. Newcastle 3 v Fulham 7
7. Norwich 9 v Southampton 9
8. West Brom 7 v Swansea 1
9. West Ham 8 v Stoke 7
10. Barnsley 6 v Huddersfield 7
11. Birmingham 4 v Ipswich 6
12. Blackburn 3 v Bolton 6
13. Blackpool 6 v Watford 6
14. Brighton 3 v Millwall 4

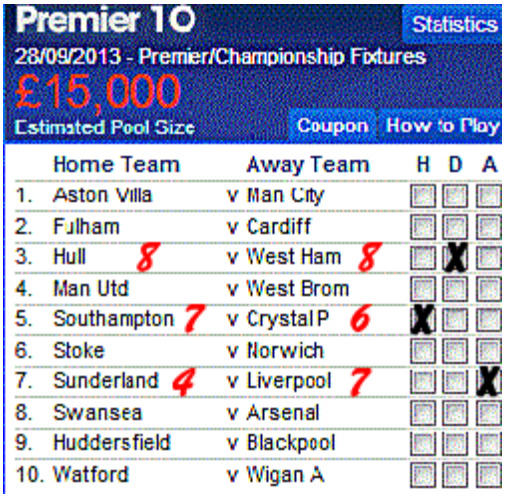
Now make your pools entry online

All you have to do now is actually make your pools entry. Just go to the official Football Pools website, fill in your selections on the online entry coupon and you're done.

Of course, each week there are new 49-match coupons on the Football Pools website, so you will carry out the same selection procedure each week – until you win!

Other pools entries you can make with Winners Research

As well as the Classic Pools, where you select matches you think will end as draws, there are other great football prediction games you can play on the Football Pools website. Two of our special favourites are Premier 10 and Super 6 where you predict a home win, away win or draw result for each of the matches. Winners Research can help you with these games too. For example, have a look at the Premier 10 game illustrated below:



In the three example selections shown above, the match prediction of draw, home win or away win has been made by looking at the individual team name *Lucky Numbers*, as revealed in the Winners Research Team Name Lucky Numbers List. In each match, one team name lucky number is higher than the other (so they would be the winner) or both team name lucky numbers are the same (so the match would be a draw). Check it out in the Winners Research Team Name Lucky Numbers List and you will see exactly how it works. So now, look up the *Lucky Numbers* for all the teams in the ten matches of the Premier 10 game, and instantly you'll be guided to see whether the prediction should be home win, away win or draw for all ten matches.

The Super 6 game works in just the same way, but you only need Winners Research to help you predict 6 correct match results to be the big cash winner!

Any questions?

If there is anything at all you are not sure about, any clarification you might need or you have any comments you want to make, you can contact us at mail @ villalibra.com

And when you win…

Please remember, the aim of the Winners Experiment *Lucky Numbers* project (apart from helping you to win a nice cash jackpot, of course) is to gain proof for the existence of *Lucky Numbers*. So please help us by letting us know about all wins you achieve. As you already know, we do NOT want to share your winnings - we only want to share your good news. So please send an e-mail to mail @ villalibra.com with as much information as you like - *but personal details are not needed*, you can contact us anonymously and in private.

Lucky Numbers for The Lottery

If you are also interested in discovering lucky numbers for the lottery, there is lots of information here that you may find useful.
